PICTURE-TAKING ANGLE CONVERTER OF VIDEO CHATTING TERMINAL

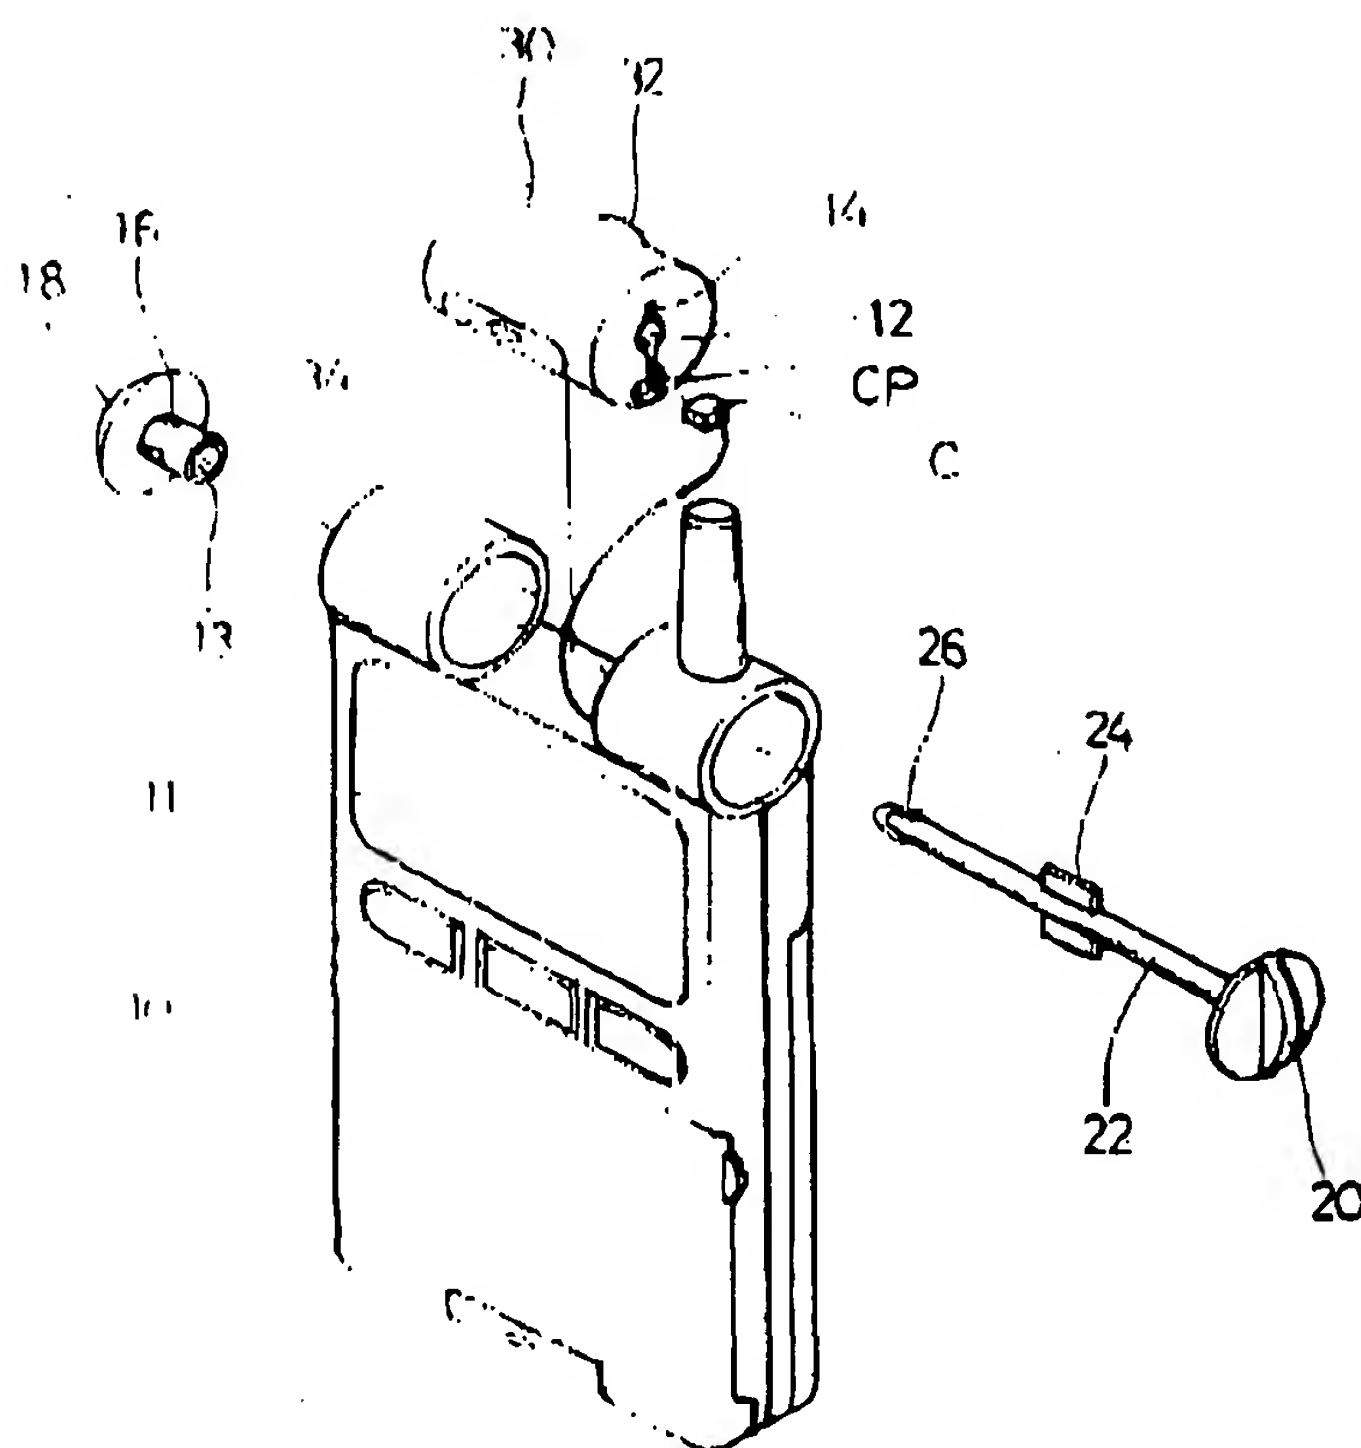

Representative drawing

(57) Abstract:

**PURPOSE:** A picture-taking angle converter of a video chatting terminal is provided to focus a picture-taking angle variously without changing the angle of a terminal by converting the picture-taking angle of the terminal fixed for a user.

**CONSTITUTION:** A picture-taking angle converter of a video chatting terminal consists of a lens(32) receiving picture-taken video data, a rotor(30) for mounting the lens on a video chatting terminal(10) rotatably, a rotating member(20) for rotating the rotator from the terminal, and a fixing unit(18) fixed on a side of the rotating member to fix the rotating member and the rotor on the terminal. In transmitting different video data to a chatting partner while transmitting video data, a user rotates the terminal toward a desired object with a rotatable grip. The rotor is rotated by the rotating grip to turn the lens of the rotor. Thereby, the picture-taking angle of the terminal is changed.
